

PROTECT YOUR BUSINESS FROM VIRUS ATTACKS— MicroLogic has the solution.

MicroLogic offers a complete Managed Virus Protection solution that's designed to protect your business from virus online attacks.

Security is a growing issue for every business. As businesses become increasingly reliant on the Internet and threats to computer networks continue to grow, it is crucial to understand the risks and secure your business.

Virus attacks affect most businesses:

- 70% of businesses reported attacks
- 10-20 new viruses are released daily
- 4% came from inside the business
- Annual cost to businesses \$24,000
- 84% of businesses reported attacks even though they had anti-virus software.

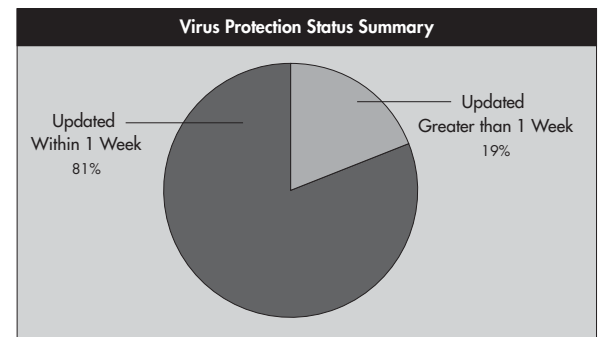

We provide proven technology options combined with personal support.

MicroLogic's Managed Virus Protection solution combines proven state of the art software with the highest technical support to insure your network is protected at all times.

This cost effective solution is available for a reasonable implementation fee, fixed monthly service fee, and no extra charges or hidden fees.

Get protection with these key features:

- Automatic virus removal
- Desktop & File Server Protection
- Centralized implementation
- Repairs changes caused by viruses
- Thwarts disabling software attacks
- Live Update of new definitions
- Scheduled protection assessments
- Management Reporting
